

Inventor: Ms. Eve Gambla
Title: IMPROVED TOILET OVERSPRAY SHIELD FOR MALES
Ser. No.: 10/792,235
Filing Date: 03/03/2004
Examiner: Mr. Robert M. Fetsuga
Group Art Unit No.: 3751

LIST OF AMENDMENTS TO THE SPECIFICATION

Please make the following changes to the first paragraph on page 12, lines 18-20 of the originally filed specification of the above patent application:

Along exterior cylindrical wall 18, there exists a flat flange means 20 that sits upon the toilet bowl rim 24 substantially along the horizontal plane such that the toilet over spray shield 10 does not fall into the toilet bowl 22.

Please make the following changes to the first paragraph on page 14, lines 2-3 of the originally filed specification of the above patent application:

Further one can see how handle means 16 is formed as part of domed cover 14,
which is an integral recessed handle. This has the added feature of reducing costs of
manufacturing and repairs because the apparatus is one formed piece without
attachment means such as screws or glue that may break or degrade after repeated
use.
